DATA CLEANING LOG

Documents every cleaning step applied to Raw_Data to produce Cleaned_Data, and the assumption behind each fix.

Step	Records Affected	Action	Assumption / Rule Applied
Raw rows loaded	280	Starting point	Direct export from source system.
Exact duplicate rows removed	14	Removed	Fully identical rows are re-exports of the same order; safe to drop.
Duplicate OrderID conflicts resolved	6	Retained with assumption	Conflicting duplicate OrderID identified; first source occurrence retained as an explicit assumption because no reliable precedence field (timestamp/status/version) was available. See Exceptions_Log for the full list.
Rows with missing OrderDate	5	Retained with assumption	OrderDate can't be reliably guessed. These 5 valid orders are retained in Cleaned_Data with OrderDate/Month/Quarter left blank, so their Sales and Profit still count toward totals; they are simply excluded from monthly/quarterly trend views.
Missing Quantity filled with dataset median (5)	4	Imputed	Median is robust to outliers vs. mean; used as best estimate for a missing quantity.
Missing UnitPrice filled with same-product median (fallback: overall median)	4	Imputed	Same product usually sells near a consistent price; overall median used only if no other price exists for that product.
Missing Discount filled with 0 (assumption: no discount recorded)	5	Imputed	Blank discount is treated as 'no discount applied' rather than unknown.
Final cleaned rows	260	Result	Rows remaining in Cleaned_Data after all steps above (255 dated + 5 undated, valid orders).

EXCEPTIONS LOG — CONFLICTING DUPLICATE ORDER IDS				
Conflicting duplicate OrderIDs resolved by assuming the first entry as valid, pending verification.				
OrderID	Issue	Conflicting Values	Action	Reason
ORD1180	Conflicting duplicate	Quantity: 5 (first) vs 3 (second)	First occurrence retained	No reliable precedence field available
ORD1021	Conflicting duplicate	Quantity: 5 (first) vs 8 (second)	First occurrence retained	No reliable precedence field available
